📍 Block 19 Iroko estate road B, Isheri Lagos State

Summary

- I am a professional and goal oriented young man, willing to go extra miles to meetup with timelines and build a well optimized and scale-able project.

- I am proficient in all Microsoft applications including word, excel and Power point. In addition, I am fluent in two languages; they are JavaScript and Dart and their framework (Flutter and React), along with html and CSS. I also have knowledge in networking (Routing and sub netting).Coupled with the above, I am also confident in my ability to learn new things quickly; for instance in my free time, I take on new projects on mobile app development. I am also very much familiar with photo and video editing software and have received so much praise from my colleagues for my top-notch skills in these programs. I believe this on more practical approaches and realize my actual potential

Programming knowledge

- HTML
- FLUTTER
- CSS
- JAVASCRIPT
- DART
- REACT
- NODE
- EXPRESSJS
